

## COMPLETE CLASSIC RANGE

Vredestein supplies a range of special tyre sizes designed for summer and winter use. When it comes to reliability and safety, the Sprint+ and Snow+ have a proven track record. Top features include excellent steering response and a longer life, due to the special tread compound and cleverly designed contour of the tyre.

Vredestein's new tyre, the Sprint Classic, completes the classic range. The Sprint Classic was specially developed for enthusiasts with an eye for detail and design. While the unique tyre profile and contour remain unchanged, a stylish sidewall marking has been added. However, beneath all the classical exterior lies the most advanced technology.

Whatever type of classic car you drive, we wish you happy driving!

### SPRINT CLASSIC

FEATURES	BENEFITS
Advanced tyre technology	Ultra-safe Up-to-date comfort Suitable for speeds up to 240 km/h (149 mph)
Sophisticated tread compound	Shorter braking distance
Specially designed innerliner	Minimum air loss
Rounded profile combined with a stylish, refined sidewall marking	Classic look
Range	7 sizes
